

To whom it may concern, I have enjoyed listening to the many commercial free channels of XM radio for about a year now and would listen to this radio station over any publicly broadcasted radio station any day. I pay to listen to what I choose, and to lose XM radio to a bunch of commercials that we hear/see through our day as it is, (TV, billboards, Junk mail, etc.) would be ruining the entire concept of having " Commercial free radio" which is why so many people have paid the money to have this station. Is it wrong to not have to listen to constant and even abnoxious commercials at every moment during our days, personally I think we see enough commercializing as it is and we do NOT need any more, especially if we are paying for the station.

So I ask you to please reject NAB's petition 04-160. I support this station because I would hate to see it go to the wolves without a good fight. Please take these words into consideration and remember how much commercials and spamming we the people have to see as it is , and think about it, we need a well deserved break.
